

The Recycle My Electronics Treasure Hunt

There's treasure buried in your home just waiting to be discovered! Let's find it together.

There's a very good chance that right now, somewhere in your home, there are electronics, just waiting to be recycled. These electronics are filled with resources that can be recovered, recycled and reused.

Search through your home for a hidden stash of old electronics. The buried treasure might include things like flip phones, smartphones, laptops, corded and wireless telephones, VCR and DVD players.

Don't forget about the invisible e-waste. It's not really invisible, just things we don't always think of as also being recyclable. Things like ear buds, remote controls, clock radios, portable speakers, speaker phones, cords and cables.

Happy Hunting!

Check off the end-of-life electronics you uncover on the list below. You'll be surprised just how much you discover.
