# Electronic Products Recycling Association Annual Report to the Director

## [2024 Calendar Year]

Submitted to:	Director, Extended Producer Responsibility Programs PO Box 9341, STN PROV GOVT Victoria, BC V8W 9M1
Prepared by:	Craig Wisehart, Executive Director Electronic Products Recycling Association
	100 – 4259 Canada Way
	Burnaby, BC V5G 4Y2
	(604) 291-1002

June 30, 2025

## **Table of Contents**

Executive Summary	3
Program Outline	6
Public Education Materials and Strategies	6
Collection System and Facilities	9
Product Environmental Impact Reduction, Reusability and Recyclability	10
Pollution Prevention Hierarchy and Product / Component Management	11
Product Sold and Collected and Recovery Rate	16
Summary of Deposits, Refunds, Revenues and Expenditures	17
Plan Performance	18
dices / Additional Information and Third Party Assurance	19
	Program Outline Public Education Materials and Strategies Collection System and Facilities Product Environmental Impact Reduction, Reusability and Recyclability Pollution Prevention Hierarchy and Product / Component Management Product Sold and Collected and Recovery Rate Summary of Deposits, Refunds, Revenues and Expenditures Plan Performance

## 1. Executive Summary

The table below should concisely summarize program performance for the section 8 annual reporting requirements such that ministry staff and the public can easily understand whether reporting requirements and stewardship plan targets have been met.

Products within plan	As outlined in Appendix B of our stewardship plan, EPRA BC covers a broad range of regulated electronic product categories, including IT, Audio/Video, Communication equipment, Medical and Control devices as well as the more common displays, computers and printers.
Program website	www.recycleMYelectronics.ca/bc

Recycling Regulation Reference	Торіс	Summary
Part 2, section 8(2)(a)	Public Education Materials and Strategies	<ul> <li>EPRA has undertaken significant marketing initiatives focused on 3 key messages:</li> <li>1. Awareness of Collection location and desired e-recycling behaviour</li> <li>2. Knowledge of acceptable products</li> <li>3. The responsible way to recycle end-of-life electronics in BC</li> <li>EPRA uses several types of media to communicate the message including: television, radio, newspapers, online and promotional materials.</li> <li>EPRA participates in and co-sponsors the RCBC Recyclepedia, hotline and depot locator app.</li> <li>In 2024, EPRA BC continued its collaboration with other stewardship agencies in promoting BC Recycles to help consumers identify a single source for recycling information</li> <li>A public opinion survey conducted on behalf of Stewardship Association of BC (SABC) in October of 2024 showed that 81% of BC residents were aware of how to recycle electronics in an environmentally friendly manner.</li> </ul>

Recycling Regulation Reference	Торіс	Summary
Part 2, section 8(2)(b)	<u>Collection</u> <u>System and</u> <u>Facilities</u>	<ul> <li>EPRA BC has a robust collection system designed to provide easy access not only to consumers but also the ICI (Institutional, Commercial and Industrial) sector.</li> <li>Consumer return of end-of-life electronics is facilitated through our extensive depot network which consisted of 242collection sites at the end of 2024 (see: <a href="http://www.return-it.ca/electronics/locations/">http://www.return-it.ca/electronics/locations/</a>) This network in conjunction with 78 return-to-retail facilities provided excellent service coverage. A study done for 2024 showed that 98.7% of the population was covered to the standards outlined in our stewardship plan.</li> <li>As a supplement to our permanent depots, we held 39 collections events within the province throughout the year.</li> <li>For the Business-to-Business (B2B) sector, we have implemented several programs to facilitate easy access to recycling of obligated material:</li> </ul>
		<ol> <li>Large volume generator program – Free pick up of material for generators meeting minimum volume requirements</li> <li>Processor incentive program – Generators can contract for the pickup and processing of material directly with recyclers approved to the ERS standard. The recyclers are compensated by the program and there is no cost to the generator for the basic pick up and recycling of obligated material.</li> <li>Information on B2B options are available here:</li> <li><u>https://www.return-it.ca/electronics/industry/b2b-options/</u></li> </ol>
Part 2, section 8(2)(c)	Product Environmental Impact Reduction, Reusability and Recyclability	This year EPRA published a report which focused on trends impacting industry-led product stewardship programs in Canada, North America and globally. This report highlights the electronics industry's progress related to designing environmentally-conscious products, explaining market trends impacting the recovery of these devices, along with the many technological advances that are creating change in electronics design. Specifically, this report focuses on the reduction of focus materials in electronic devices and the electronics industry's efforts to enhance sustainability throughout the product lifecycle. Manufacturers are continuing to reduce the amounts of certain metals, flame retardants and plastics which are can be harmful to the environment. This report is available at the link below: <a href="https://epra.ca/ges">https://epra.ca/ges</a> Reuse and Recycling are covered in detail in Section 5 below.
Part 2, section 8(2)(d)	Pollution Prevention Hierarchy and Product / Component Management	Recycling end-of-life electronics diverts materials from landfills and ensures the management of the deposition of these materials in an environmentally and socially responsible way. Recycling also saves energy, as materials recovered can be used to create new useful products, ultimately reducing the energy demands associated with the extraction and processing of new raw material. See Section 6 for details.

Recycling Regulation Reference	Торіс	Summary
Part 2, section 8(2)(e)	Product Sold and Collected	In 2024, our stewards reported the supply of 13,923,277 regulated electronic products into the province. During 2024, we collected a total of 12,813 metric tonnes of end-of-life electronics.
Part 2, section 8(2)(e.1)	and Recovery Rate	See Section 7 for breakdown per regional district
Part 2, section 8(2)(f)	Summary of Deposits, <u>Refunds,</u> <u>Revenues and</u> Expenses	Audited financial information is available in Appendix E

## 2. Program Outline

Provide a brief (1 page) overview of the stewardship agency/company and their members [website link], program inclusions, collection approach and any other high-level information relative to the annual report e.g. studies completed, new targets set, consultations or surveys conducted.

In the last decade, product stewardship programs have grown in popularity across Canada and around the world. A true partnership between industry, government and consumers, stewardship programs provide a sustainable model to divert and recover materials from the waste stream. They also improve recycling efforts within our communities as increasingly, consumers expect convenient, accessible and responsible recycling for their end-of-life products, including electronics.

The Electronic Products Recycling Association (EPRA) is the national organization tasked with promoting and managing end-of-life electronics recycling in Canada. EPRA is an industry-led, voluntary, not-for-profit environmental compliance program dedicated to responsible recycling of end-of-life electronics and providing secure, convenient recycling options in the provinces in which it operates.

Being a part of the national EPRA organization has benefitted industry, consumers and other stakeholders in British Columbia by enabling our ability to further deliver best practices in industry-led electronics recycling.

2024 saw a continuation of our Return-to-Retail program with a number of major national retailers collecting endof-life electronics as part of our program. This provides consumers with yet another convenient option for recycling in BC.

EPRA is committed to ensuring responsible recycling of end-of-life electronics collected by EPRA programs through adherence to the Electronics Recycling Standard (ERS). The ERS is a comprehensive process that ensures products and resulting materials are handled in an environmentally sound and socially acceptable manner that protects the environment and safeguards worker health and safety.

EPRA BC enables businesses and consumers to responsibly manage their end-of-life electronics, and assists obligated stewards in achieving regulatory compliance. Currently there are over 1,700 stewards\* registered with EPRA in British Columbia, 242 permanent collection sites and 4 verified processors. In 2024, EPRA BC safely collected and responsibly recycled 12,813 tonnes of end-of-life electronics.

EPRA amalgamated with the Canadian Electrical Stewardship Association (CESA) effective October 1, 2024 but the 2 organizations were operated as separate entities for the remainder of 2024. Therefore, this report shows only the results of the EPRA program and there will be a separate full year report issued for CESA for 2024.

## 3. Public Education Materials and Strategies

Provide a brief overview of the key materials and strategies used to promote awareness of the program. Identify the various types of outreach (i.e. face to face, social media, traditional media, etc.) utilized.

EPRA BC continues to reach consumers and raise awareness of the program through many types of media including television, radio, newspapers (ads and articles) online, etc. Different types of media are used strategically to target specific audiences with a tailored message and the publishing and placement of each advertisement is carefully planned to ensure that the target audience is reading, listening or watching.

To maintain high levels of awareness, consumers need consistent messaging on a regular basis. As EPRA BC has matured, our consumer awareness message has become more strategic and targeted to reach the right people at the right time with a meaningful and motivating message.

In 2024, EPRA actively promoted the program in BC through earned media (PR) and advertorials. EPRA received coverage in in key recycling periods with circulation and viewership of 51,716,323 impressions.

		TOTAL IMPRESSIONS		51,716,323	

Included in the numbers above was a specific program to improve awareness of specific product categories, Medical Equipment and Musical Instruments. An example of this is below:

In 2024, we continued to target some ICI (Institutional, Commercial and Industrial) organizations to raise awareness in that sector. In addition, EPRA BC continued to work in conjunction with other BC stewards to better understand how to ensure consumers knew where and how to recycle the wide range of obligated products in the province. We have previously introduced messaging to help British Columbians understand what happens to the products after they are dropped off for recycling. An example of that messaging is our website to help consumers understand our process.

http://www.recyclemyelectronics.ca/bc/what-can-i-do/where-does-it-go/

We continue to make available a video to assist retailers with training of their staff to better communicate the Environmental Handling Fee (EHF) to consumers.

#### http://recyclemyelectronics.ca/bc/stewards/what-is-the-ehf-a-training-video/

Moving forward, we plan to continue with our existing efforts to inform consumers of depot location, products accepted, fee structure, etc. We will continue to work to reinforce consumer awareness, heighten the credibility of our brand and promote the BC product stewardship model as the best way to operate Extended Producer Responsibility programs.

Please refer to Section 9 below for key statistics related to Public Education and Awareness.

## 4. Collection System and Facilities

Provide a brief overview of the way in which the stewardship agency collects the products from the consumer (i.e. depots, return to retailer, collection events, etc.). If available, list the number of collection facilities in each regional district and identify changes in the number, location, and method of collection from the previous year to the present year. If the list is extensive, consider including a summary and attaching a separate document or URL.

Collection sites consist of a group of Encorp Return-It depots, regional government locations and non-profit organizations throughout the province as well as a number of Return-to-Retail locations. Since the launch of the program in August of 2007, we have more than tripled the number of collection sites from 70 to 242. From 2023 to 2024 we had a net increase of 4 depots. This included 6 additions and 2 deletions. The 2 deletions were Habitat for Humanity locations are not public sites.

The current EPRA collection network provides comprehensive coverage of both rural and urban locations throughout the province. EPRA BC has committed to continue to review opportunities that would enhance the collection system. We are also working with community partners to conduct Drop-Off Events in various regions of the province. In 2024, EPRA BC conducted 39 such drop off events (see Appendix C for locations.)

In addition to our regular collection depot network, at the end of 2024 our Return-to-Retail program consisted of 78 locations of several major national electronics retailers across BC to further enhance consumer convenience.

The combination of permanent collection depots and Return-to-Retail locations provided coverage to 98.7% of the province as outlined in our February 2024 study.

The inclusion of more ICI material introduced in 2012 increased the need for a more robust Business-to-Business (B2B) collection system and we have implemented several programs for businesses and other institutions to facilitate easy access to recycling of obligated material:

1. Large volume generator program – Free pick up of material for generators meeting minimum volume requirements

2. Processor incentive program – Generators can contract directly with approved recyclers for the pickup and processing of material. The recyclers are compensated by the program and there is no cost to the generator for the basic pick up and recycling of obligated material.

Information on B2B options is available here: <u>https://www.return-it.ca/electronics/industry/b2b-options/</u>

## 5. Product Environmental Impact Reduction, Reusability and Recyclability

Identify ways in which producers or the agency contributes to the reduction of environmental impact. For example, utilization of certified processors, R&D performed to improve recyclability / reuse of the product or components, examples of design for environment mechanisms used by producer members of the agency, reduction of greenhouse gas emissions. The producer may also wish to report on the status of any studies being undertaken to assist with the measurement of environmental impacts. Identifying successes is encouraged.

EPRA supports the concept of the "3 Rs" of Reduce, Reuse and Recycle.

*Reduce:* The reduce component was addressed above in the executive summary.

**Reuse:** Reusing unwanted electronic products is promoted through the communications and public awareness program as the first option where markets and opportunities for reuse in-province exist. We also work with local charitable entities to explain the Electronics Reuse & Refurbishing Program (ERRP) and assist with their qualification. Computers for Schools has been certified to the ERRP standard for their facility in British Columbia. Obligated products that are used or refurbished will not attract an EHF. EPRA's approach to reuse and refurbishment is consistent with the industry's position that it will follow Canada's Basel Convention commitments and not allow end-of-life electronics management challenges to be passed on to less developed countries.

Reuse is promoted on our EPRA BC website under the Service Providers tab at:

#### http://recyclemyelectronics.ca/bc/service-providers/info-for-reuse-organizations/

**Recycle:** Recycling or processing of unwanted and end-of-life electronics is promoted as the final option. Recycling, which diverts electronics waste from landfill and illegal export, is the major focus of the EPRA program. Typically, recycling involves some form of "primary" or initial processing, which may include dismantling and sorting of material by hand or by more elaborate mechanical means. Further manual or mechanical separation of materials by another vendor or vendors is considered "downstream" processing. Material flows will be tracked to their "point of final processing" (i.e. where they are altered into a new product or state) or, for unrecyclable hazardous materials, to their point of disposal (i.e., where they are disposed of in an environmentally sound manner).

All recycling will be completed by contractors who meet the Electronics Recycling Standard (ERS) which may be updated from time to time in order to ensure they meet the ongoing needs of the programs which have adopted them.

To ensure that all materials collected under an EPRA program will be responsibly recycled, EPRA has established the following criteria for service:

Service providers must be ERS certified prior to receiving any collected EPRA program materials for processing; and

Service providers will be responsible for ensuring that any and all (downstream) processors needed for further/additional processing of program materials (after primary processing) have also successfully completed the ERS process prior to receiving any collected EPRA program materials for processing.

The Recycle component including product management and outcomes is covered in detail in Section 6.

## 6. Pollution Prevention Hierarchy and Product / Component Management

Provide a brief overview of the way in which the collected product is managed and how those outcomes relate to the pollution prevention hierarchy. Provide breakdowns by weight or percentage of product managed at each

*level.* Please also refer to third party assurance FAQs (original version dated November 22, 2012), distributed to stewardship programs by the Ministry.

#### Recycling

Recycling end-of-life electronics diverts materials and substances of concern from landfills and prevents the shipment of these materials to locations where disposal will not be managed responsibly. Recycling also saves energy, as materials recovered can be used to create new useful products, ultimately reducing the energy demands associated with the extraction and processing of new raw material.

Recycling of electronics involves processing to recover raw materials such as metals, glass and plastics. The EPRA recycling program was developed to make sure the responsible recycling of end-of life electronics is conducted according to high, internationally recognized standards, regardless of commodity revenues.

EPRA environmental governance includes policies and processes that ensure recycled materials are handled in a safe, secure and approved fashion and can be tracked accordingly. This is accomplished through a two-step approach. The Recycler Qualification office is employed upfront to only certify processors who meet the Electronic Recycling Standard (ERS). Secondly, the provincial programs follow through with quarterly Mass Balancing procedures that capture actual volumes collected and processed by primary processors and the resulting volumes and destinations of output materials, which acts as a control to ensure ERS certified processors are used.

#### **Recycler Qualification Office**

The Recycler Qualification Office (RQO) was established by the industry-led end-of-life electronics stewardship programs to ensure that environmentally sound electronics reuse and recycling standards are established, met, maintained and continually improved upon.

The RQO manages all recycler assessments and approvals on behalf of the provincial stewardship programs, to ensure assessments are undertaken in a timely manner, and results are objective, thorough, and sufficiently detailed to provide confidence in the results of the assessment.

#### **Electronic Recycling Standard (ERS)**

This is the publication that defines the Stewardship Programs' minimum requirements and approach to auditing and approving end-of-life electronics (EOLE) Recyclers to ensure that EOLE are handled in an environmentally sound and socially acceptable manner that protects the environment and safeguards worker health and safety by all processors within the material processing pathway.

Specifically, the RQO assesses processors for

- Third party certification to the Responsible Recycling ('R2') Standard, an industry-developed standard establishing practices for the recycling of electronics globally
- Legal and regulatory compliance
- Worker safety
- Material handling and destination safety and compliance

Within material handling, RQO procedures include identifying use of ERS certified downstream parties and destination of product.

#### **Mass Balancing**

Once a provincial program has contracted with recyclers, the mass balance quarterly reporting process undertakes validation of actual volume handled by primary processors.

Mass balancing reporting has the following objectives:

- Ensuring input volumes match output volumes within 3%
- Identify whether any output materials are sent to non-ERS certified downstream processors and determine appropriate follow up measures to ensure processing pathways are compliant.
- Ensuring primary processor compliance with provincial inventory limits

The mass balancing reports require input volume, processed volume and output to be identified by each primary processor each quarter. The reporting also requires percentage of product by material type to be reported. While the information is self-reported, spot audits are performed on of a minimum of 1 primary processor per year. Supporting backup documentation is reviewed against the data reported in the quarterly mass balance report to check the accuracy of the reported data. Non-conformities are issued and action plans are developed by primary recyclers to address any issues noted during the spot audits as a management tool to address risk and meet the stated objectives of mass balancing. However, historic reported figures are not adjusted to reflect the issues identified, therefore, we recognize that the reported figures below are not reflective of adjustments that might occur as a result of issue resolution and are an indicative rather than exact reflection of the mass balance reporting.

Proactive validation by the RQO of all processors who manage and distribute materials to ERS compliant destinations, combined with mass balance reporting by primary processors to validate that what was committed is in fact in place, serve to ensure a reliable, safe destination for recycled electronic materials.

#### 2024 EPRA BC Mass Balance Results

The following tables report the processing category and material type / component for material received and processed by Primary Processors on a weighted-average basis. The information is based on quarterly mass balance reporting by Primary Processors which includes the destination of material shipped from their facilities.

#### **Categorical Outputs**

The table below represents the weight of materials shipped from primary processors to downstream processors which is reconciled within an allowable 3% variance to total WEEE collected of 12,813 metric tonnes as part of our mass balancing process.

As the amount reported by primary processors is greater than the amount of WEEE reported by EPRA this further supports that all processed materials had known end fates.

Type of Disposition	Average
Material Recovery	93.36%
Energy Recovery	0.47%
Unknown Fate	2.36%
Landfill	3.80%
Total	100%

Material/ Component	% of Material Stream	Process	END DESTINATION
Ferrous Materials	43.41%	Metals are manually and/or mechanically separated and smelted for reclaim.	Canada & United States of America
Plastic	21.02%	Plastics are manually and/or mechanically separated. Identifiable plastics are cleaned, sorted and pelletized for reuse; any unidentifiable plastics are landfilled, used as a fuel substitute in the process of metal smelting, or used in the production of alternative fuels.	Canada, United States of America, China and Malaysia.
Mixed Metals	9.84%	Metals are manually and/or mechanically separated and smelted for reclaim.	Canada & United States of America
Circuit Boards	4.20%	Boards are manually and/or mechanically separated and smelted for reclaim of precious metals, while the plastics are used as a fuel substitute in the smelting process.	Canada, United States of America & Japan
Leaded Glass	3.30%	Tubes are manually and mechanically separated and either cleaned and processed into cullet for use in glass production, or smelted for reclaim of lead from the glass.	Canada & United States of America
Wires / Cables	2.90%	Manually and/or mechanically separated and smelted for metal recovery, while the plastics are either used as a fuel substitute in the smelting process, or mechanically separated and landfilled.	Canada & United States of America
Copper Bearing Material	2.89%	Metals are manually and/or mechanically separated and smelted for reclaim.	Canada & United States of America
Landfill	2.73%	Materials sent to landfill	Canada
Other	2.36%	Materials are manually separated and managed through an energy-from-waste recovery process or landfilled.	Canada & United States of America
Aluminum	2.06%	Metals are manually and/or mechanically separated and smelted for reclaim.	Canada & United States of America
Metal dusts / fines	1.15%	Mechanically separated and smelted for reclaim.	Canada, United States of America and Japan

Wood	1.07%	Materials are manually separated and managed through an energy-from-waste recovery process or landfilled.	Canada
EOLE	1.05%	Whole units transferred from the primary recycler to an approved secondary processor for mechanical or manual processing	Canada
Non-leaded Glass	0.98%	Non-leaded glass is manually separated for recovery and further use, or introduced into the smelting process as a silica flux substitute.	Canada & United States of America
Batteries	0.53%	Mechanically separated for recovery of metals.	Canada & United States of America
Ink / Toner Cartridges	0.47%	Cartridges are cleaned and reconditioned for reuse or processed through an energy-from- waste recovery process.	Canada & United States of America
Mercury Lamps	0.04%	Lamps are mechanically processed and separated into glass, metal and phosphor powder material streams. Phosphor power is further distilled for mercury recovery. Metal and glass are also reclaimed for further use.	Canada & United States of America
Ethylene Glycol	0.01%	The glycol is manually drained from the light tubes and refined for further use.	Canada & United States of America
Media	0.00%	Materials are manually separated and managed through an energy-from-waste recovery process or landfilled.	Canada & United States of America

NOTE: Materials shipped 12,812 MT. The Primary Processors have decreased inventory on hand to 1,003 MT

#### **Primary Processors**

As of December 31, 2024, the following were approved as EPRA BC primary processors:

eCycle Solutions Chilliwack, BC www.ecyclesolutions.com

Quantum Lifecycle Partners Edmonton, AB www.quantumlifecycle.com

FCM Recycling Delta, BC www.fcmrecycling.com

Hi Tech Recyclers Edmonton, AB https://hitechrecyclers.ca/

## 7. Product Sold and Collected and Recovery Rate

Provide a summary of the total amount of product sold, collection volumes and, if applicable, recovery rates achieved by the program based on the approach included in the approved program plan. Also provide a summary of total product recovered by regional district.

In 2024, our stewards reported the supply of 13,923,277 regulated electronic products into the province. During 2024, we collected a total of 12,813 metric tonnes of end-of-life electronics. The breakdown of the product recovered by regional district is summarized in the chart below.

Due to the nature of our products as durable goods, and their associated long life cycle, a recovery rate calculation is not practical. Instead our Stewardship Plan was approved based on reporting on a suite of measures as outlined in sections 1 and 9.

Stewardship Agency Name Program Name		Electronics Products Recycling Association Electronics			
Report Period (Calendar or Fiscal)		January 1, 2024 to December 31, 2024			
Count	Name	Population Per 2024 Government of BC KGs Collected KGs per constraints		KGs per capita	
1	Alberni / Clayoquot	36,222	81,889	2.3	
2	Bulkley / Nechako	39,417	157,212	4.0	
3	Capital Regional Dist	460,317	1,166,593	2.5	
4	Cariboo	66,801	136,034	2.0	
5	Central Coast	4,022	7,638	1.9	
6	Central Kootenay	68,723	118,656	1.7	
7	Central Okanagan	251,723	838,889	3.3	
8	Columbia Shuswap	62,401	142,191	2.3	
9	Comox	79,276	236,281	3.0	
10	Cowichan Valley	95,264	265,751	2.8	
11	East Kootenay	72,534	134,919	1.9	
12	Fraser Valley	362,635	655,779	1.8	
13	Fraser -Fort George	106,248	219,460	2.1	
14	Kitimat - Stikine	42,190	104,812	2.5	
15	Kootenay Boundary	35,360	112,067	3.2	
16	Metro Vancouver	3,108,926	6,643,022	2.1	
17	Mount Waddington	11,411	35,025	3.1	
18	Nanaimo	186,121	396,304	2.1	
19	North Coast	19,074	48,606	2.5	

20	North Okanagan	99,800	250,951	2.5
21	Northern Rockies	4,641	9,572	2.1
22	Okanagan - Similkam	93,912	207,272	2.2
23	Peace River	67,374	133,792	2.0
24	Qathet	23,056	-	-
25	Squamish - Lillooet	56,433	126,662	2.2
26	Strathcona	51,465	119,561	2.3
27	Sunshine Coast	34,208	102,507	3.0
28	Thompson - Nicola	158,876	319,398	2.0
	Grand Total	5,698,430	12,770,838*	2.2

\* Total material collected was 12,813 MT. Some material collected comes from mixed sources and is not able to be identified by Regional District.

## 8. Summary of Deposits, Refunds, Revenues and Expenditures

#### For those programs that charge deposits only:

Include a summary of deposits received and refunds paid in British Columbia by the producers (by plan if agency manages more than one plan). Attach a copy of the current year's independently audited financial statements as an appendix.

#### N/A

#### For those programs that charge a visible ecofee only:

Include a summary of fees / rates charged by the agency and provide a summary of total revenues and expenses in British Columbia (by plan if agency manages more than one plan). Attach a copy of the current year's independently audited financial statements as an appendix.

The Program is funded by a visible Environmental Handling Fee (EHF) paid by the consumer at the time of purchase of obligated electronic items. The EHF is used to fund the collection, transportation and recycling of the material as well as administrative costs and consumer awareness efforts.

A listing of obligated products is available at the link below:

#### https://www.return-it.ca/electronics/products/

The information on revenues and expenses is in the financial statement in Appendix E

## 9. Plan Performance

Using the table below, provide a brief overview of the performance of the plan for the current year compared to the stated performance requirements and targets specified in the approved plan. If no specific targets have been set (e.g. new plans in first year of operation), specify baseline results, significant achievements and identify when targets will be set.

Metrics	Performance Targets and Reporting Commitments
Governance	There were no significant changes to the governance structure
Products sold and collected	
Amount of product sold (units)	13,923,277
Amount of product collected (weight)	12,813 metric tonnes
Amount of product collected by regional district	See Section 7 of this report
Amount of product collected per capita by regional district and total for the province	See Section 7 of this report
Collection System and Accessibility	
Location and number of contracted collection sites, and changes in location and number from previous report	See Appendix B

#### 2024 Performance Targets and Reporting Commitments

Number of contracted sites by RD	See Appendix D
Number and location of contracted collection events by	See Appendix C
RD	
Locations of underserved area according to the accessibility standard as defined in the plan along with the events held to provide accessibility in these areas	Creston – 2 collection events were held in Creston in 2024
Percent of population with access to a collection location (97% target)	98.7%
Qualitative report on product on categories with low awareness	See Section 7 of this report
Wasto Audits	

Waste Audits

The results of local government waste composition	In 2024, 5 wast	e audit was done as outli	ned below:	
studies identified in kilogram (kg) per capita of program material and the total amount batteries from		Per Capita (kg/yr.)		
each of the studies		Electronics	Batteries (total)	
	CVRD	1.5	0.3	
	Squamish	3.6	0.2

## **APPENDIX A**

#### ELECTRONIC PRODUCTS RECYCLING ASSOCIATION

#### INDEPENDENT REASONABLE ASSURANCE REPORT

#### **31 DECEMBER 2024**

## INDEPENDENT REASONABLE ASSURANCE REPORT

To the Management of Electronic Products Recycling Association,

#### **Assurance Level and Selected Information**

We have been engaged by Electronic Products Recycling Association ("EPRA") to perform a reasonable assurance engagement in respect of the following information (the "Selected Information"), detailed in Appendix 1, and also included within EPRA's Annual Report for the Electronic Products Recycling Association B.C. Program to the British Columbia Ministry of Environment and Parks for the year ended 31 December 2024:

- Section 4 Collection System and Facilities and Appendix B the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of BC Regulation 449/2004 (the "Recycling Regulation");
- Section 6 Pollution Prevention Hierarchy and Product/Component Management the description of how the recovered product was managed in accordance with the pollution prevention hierarchy under Section 8(2)(d) of the Recycling Regulation;
- Section 7 Product Collected the description of how total amounts of the producer's product collected has been calculated in accordance with Section 8(2)(e) of the Recycling Regulation; and
- Section 9 Plan Performance the description of performance for the year in relation to targets in the approved stewardship plan under Section 8(2)(b), (d) and (e) of the Recycling Regulation.

Our reasonable assurance engagement does not constitute a legal determination on EPRA's compliance with Sections 8(2)(b), (d) and (e) of the Recycling Regulation.

#### Responsibilities

Preparation and fair presentation of the Selected Information in accordance with the evaluation criteria as listed in Appendix 1 is the responsibility of EPRA's management. Management is also responsible for such internal control as management determines is necessary to enable the preparation of the Selected Information such that it is free from material misstatement. Furthermore, management is responsible for preparation of suitable evaluation criteria in accordance with the Recycling Regulation Guidance - Third Party Assurance for Non-Financial Information in Annual Reports – 2024 Reporting Year dated November 2024 as specified by the Director under section 8(2)(h) of the Recycling Regulation of the Province of British Columbia.

Our responsibility is to express an opinion on the Selected Information based on the procedures we have performed and the evidence we have obtained.

#### **Evaluation Criteria**

The evaluation criteria presented in Appendix 1 are an integral part of the Selected Information and address the relevance, completeness, reliability, neutrality and understandability of the Selected Information.

#### **Applicable Quality Control Requirements**

We apply the Canadian Standards on Quality Management and, accordingly, maintain a comprehensive system of quality control, including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

#### Scope of the Reasonable Assurance Engagement

We carried out our reasonable assurance engagement in accordance with the International Standard on Assurance Engagements 3000 (ISAE 3000) published by the International Federation of Accountants. This Standard requires that we comply with independence requirements and plan and perform the engagement to obtain reasonable assurance about whether the Selected Information is free of material misstatement.

A reasonable assurance engagement includes examining, on a test basis, evidence supporting the amounts and disclosures within the Selected Information. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement in the Selected Information due to omissions, misrepresentations and errors. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the Selected Information in order to design assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing a conclusion on the effectiveness of the entity's internal control. A reasonable assurance engagement also includes assessing the evaluation criteria used and significant estimates made by management, as well as evaluating the overall presentation of the Selected Information. The main elements of our work were:

- Gain an understanding of the data collection, monitoring and reporting processes through inquiries of management;
- Testing the processes, documents and records on a sample basis;
- Re-calculating quantitative data on a sample basis as it pertains to the Selected Information; and
- Evaluating the presentation of the Selected Information in the Annual Report.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

#### **Inherent Limitations**

Non-financial performance information is subject to more inherent limitations than financial information, given the characteristics of the Selected Information and the methods used for determining and calculating such information. Qualitative interpretations of relevance, materiality and the accuracy of data are subject to individual assumptions and judgments. Furthermore, the nature and methods used to determine such information, as well as the evaluation criteria and the precision thereof, may change over time. It is important to read our report in the context of evaluation criteria.

#### Conclusion

In our opinion, the Selected Information within EPRA's Annual Report for the Electronic Products Recycling Association B.C. Program for the year ended 31 December 2023 presents fairly, in all material respects, in accordance with the evaluation criteria listed in Appendix 1:

- The location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation;
- The description of how the recovered product was managed in accordance with the pollution prevention hierarchy under Section 8(2)(d) of the Recycling Regulation;
- The description of how total amounts of the producer's product collected has been calculated in accordance with Section 8(2)(e) of the Recycling Regulation; and
- The description of performance for the year in relation to targets in the approved stewardship plan under Section 8(2)(b), (d) and (e) of the Recycling Regulation.

#### **Emphasis of Matter**

Without qualifying our opinion, the following should be noted regarding the information in the Annual Report:

- The EPRA B.C. Program does not present a recovery rate in the Annual Report. As such, the total
  amount of producer's products sold as presented in Section 7 Product Sold and Collected and
  Recovery Rate of the Annual Report has not been included in the Selected Information in
  accordance with the Recycling Regulation Guidance Third Party Assurance for Non-Financial
  Information in Annual Reports 2024 Reporting Year dated November 2024 as issued by the
  British Columbia Ministry of Environment and Parks.
- 2. EPRA amalgamated with the Canadian Electrical Stewardship Association (CESA) effective 1 October 2024, but the two organizations were operated as separate entities for the remainder of 2024. Therefore, the Annual Report shows only the results of the EPRA program.

#### **Other Matter**

Our report has been prepared solely for the purposes of management's stewardship under the Recycling Regulation and is not intended to be and should not be used for any other purpose. Our duties in relation to this report are owed solely to EPRA, and accordingly, we do not accept any responsibility for loss occasioned to any other party acting or refraining from acting based on this report.

Rolfe, Benson LLP

CHARTERED PROFESSIONAL ACCOUNTANTS

Vancouver, Canada 26 June 2025

#### Appendix 1

#### **Evaluation Criteria**

#### **Collection facilities**

Specific disclosures in the annual stewardship report from Section 4 - Collection System and Facilities for which evaluation criteria were developed				
Disclosure per Annual Report	Reference			
Total number of collection facilities in 2024 – 242	Section 4 - Collection System and Facilities page 10			
Change in number of collection facilities in 2024 – 6 opened, 2 closed	Appendix B – pages 23-28 (excluding Return to Retail Sites)			

"Since the launch of the program in August of 2007, we have more than tripled the number of collection sites from 70 to 242. From 2023 to 2024 we had a net increase of 4 depots. This included 6 additions and 2 deletions. The 2 deletions were Habitat for Humanity locations and are not public sites."

#### APPLICABLE DEFINITIONS

The following definitions were applied to the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation:

- Collection Facility: any facility that has a signed End-Of-Life Electronics ("EOLE") Agreement for the collection of returned EOLE and is included on the EPRA/Encorp website. A collection facility does not include collection events or return-to-retail facilities.
- Collection Event: any collection of EOLE that does not require signing of an EOLE Agreement to become a permanent collection facility.
- Return-to-Retail Facility: a retail facility that collects and ships EOLE directly to Primary Processors. These facilities do not require signed EOLE agreements.

#### APPLICABLE CRITERIA

The following applicable criteria were applied to the assessment of the location of collection facilities, and any changes in the number and location of collection facilities from the previous report in accordance with Section 8(2)(b) of the Recycling Regulation:

- The number of collection facilities is determined based on the number of collectors with signed End-Of-Life Electronics agreement in place with Encorp for collection of EOLE.
- The number of collection facilities reported in the annual report is reconciled to the total number of collection facilities accepting EOLE on Encorp's list of collectors as of December 31, 2024.
- All collection facilities in Encorp's listing have signed EOLE agreements in place with Encorp for collection of EOLE as of December 31, 2024.
- The change in number of collection facilities is determined by comparing the total number of collection facilities at December 31, 2024 to the total number and location of collection facilities at December 31, 2023.

#### **Pollution Prevention Hierarchy**

Specific disclosures in the annual stewardship report from Section 6 - Pollution Prevention Hierarchy and Product/Component Management for which evaluation criteria were developed			
Disclosure per Annual Report Reference			
Description of the Recycler Qualification Office and the Electronic Recycling Standard	Section 6		
Description of Mass Balancing	Pollution Prevention and Hierarchy and Product/Component Management		
2024 EPRA BC Mass Balance Results	Pages 11-16		

#### APPLICABLE DEFINITIONS

The following definitions were applied to the assessment of the description of how the recovered product was managed in accordance with the pollution prevention hierarchy in accordance with Section 8(2)(d) of the Recycling Regulation:

- Total weight of material processed, by category, is determined based on scaled deliveries from consolidation sites which are reconciled to invoiced material receipts from primary processors.
- Processors are defined as operations or facilities that manually or mechanically sort or process recovered material prior to (combined or segregated) transfer to a facility where the materials are recovered to the point where the material can enter back into the supply chain as a commodity, is used for energy generation or is treated as waste.
- Primary processors are defined as operations or facilities that receive program product and initiate the recycling process by dismantling the product and sorting the materials through manual and/or mechanical means into various streams for the purpose of reclaiming recyclable materials and other approved management of residuals by downstream processors. This does not include consolidation, cross-docking, or brokering of received material without processing.
- Downstream processors are defined as operations or facilities that receive material from a primary processor or other downstream processors for the purpose of additional processing, refining and/or approved disposition of the material.
- Sites of final recovery are sites that accept unprocessed or processed material and treat the material to the point where it can enter back into the supply chain as a commodity, is used for energy generation or is treated as waste.

#### APPLICABLE CRITERIA

The following applicable criteria were applied to the assessment of the description of how the recovered product was managed in accordance with the pollution prevention hierarchy in accordance with Section 8(2)(d) of the Recycling Regulation:

- Acceptable end fates are determined in accordance with EPRA's approved stewardship plan, applicable regulation, and qualitative information on processing methods and end fate of materials/components obtained through Recycler Qualification Office (RQO) audits and due diligence processes.
- EPRA maintains quantitative monitoring of deliveries to primary processors and from primary processors to the next point in the recycling process (mass balancing). To the extent that there are further steps in the recycling process prior to a point of final disposition, qualitative data is collected and the processing pathways are subject to a periodic audit process.

- Mass balancing data is compiled from self-reported data from sites of final recovery. The compilation of the data is subject to 3rd party assurance, but the base data remains unaudited and may include estimates where sites of final recovery are unable to, or choose not to, report data.
- Prior to approval, all new processors are subject to an initial due diligence review that ensures certification to the Electronic Recycling Standard (ERS). This review establishes the downstream processing pathways and ensures identified points of final recovery for each category are consistent with the acceptable end fates identified. This review also includes confirming there are no further processing steps involved in material recovery and that the sites have regulatory approval to undertake the declared types of recovery.
- Primary processors report the weights shipped and the next destination of material components (e.g. wires & cables, copper bearing material, copper yokes, circuit boards, etc.) on a quarterly basis.
- EPRA reviews the primary processor reporting on a quarterly basis to ensure material components are processed in line with the processing pathways as determined by the approved RQO Downstream Flow documentation. For any material components identified as processed by unapproved processors, EPRA initiates a follow-up process including confirming approval status with RQO and contacting primary processors to investigate or stop shipments depending on the nature of the material.
- On an annual basis, EPRA reviews primary processor reporting to ensure total input volumes match the total output volumes, including changes in inventory, within a 3% margin of error.
- Nationally, EPRA performs an annual verification of one primary processor's quarterly mass balance report to ensure reported data is accurate by comparing the reported output volumes to shipping documents and investigating any significant differences.
- Based on primary processor reporting and the qualitative information on processing pathways of material components obtained through the RQO program, on an annual basis EPRA consolidates primary processor data and reports on a weighted average basis estimated conformance with acceptable end fates achieved with respect to the processing of components / materials.
- All approved processors are subject to ongoing audit requirements as outlined in the Interim RQO Audit Policy that came into effect during Q2 2020 in response to COVID-19 and remains in effect as at December 31, 2024. The frequency and type of audit is risk-based and depends on the type of material handled, processing activities undertaken and whether it is processed in or outside of Canada.
- In addition to the standard re-audit frequency, a re-audit may be initiated prior to a scheduled review as a result of:
  - a request for a change to an approved process, such as the materials processed, processing methods undertaken, or any downstream recyclers used; or
  - as a result of any significant issues identified outside of the audit process, such as through media reports, regulatory notices or other incident reports.

Organizations may also be subject to periodic interim surveillance reviews to monitor status or performance against the identified requirements.

#### **Product collected**

Specific disclosures in the annual stewardship report from Section 7 - Product Sold and Collected and Recovery Rate for which evaluation criteria were developed				
Disclosure per Annual Report				
Product Collected – 12,813 metric tonnes Section 7				
	Product Sold and Collected and Recovery Rate			
	Pages 17-18			

#### APPLICABLE DEFINITIONS

There are no applicable definitions.

#### APPLICABLE CRITERIA

The following applicable criteria were applied to the assessment of total amounts of the producer's product collected in accordance with Section 8(2)(e) of the Recycling Regulation:

- Product Collected (from collection facilities): The weight of product collected is based on the weight of material shipped to processors by consolidation facilities as reported to Encorp on the Movement Authorization forms (MAs) accompanying the load. Product weights identified on processors' invoices are reconciled against shipping weight on MAs for the specific pallets shipped.
- Product Collected (from direct shippers or return to retail facilities): The weight of product collected is based on the weight of material shipped to processors as reported to Encorp on invoices and weight scale receipts received from processors. The weight scale tickets by direct shippers and return to retail facilities are reconciled against the invoices by processors from consolidation sites.

#### **Performance targets**

Specific disclosures in the annual stewardship report from Section 9 - Plan Performance for which evaluation criteria were developed

No targets relating to Section 8(2)(b), (d) and (e) of the Recycling Regulation were presented in the 2024 Annual Report.

#### APPLICABLE DEFINITIONS

There are no applicable definitions.

#### APPLICABLE CRITERIA

The following applicable criteria were applied to the description of performance for the year in relation to the specific targets associated with Section 8(2)(b), (d) and (e) of the Recycling Regulation in the approved stewardship plan:

- Targets in the approved stewardship plan as of November 6, 2018 have been identified and reported on by management in the annual report.
- The description of progress against targets to date is supported by records of progress maintained by the Company.

## **APPENDIX B**

#### EPRA Collection Sites As Of December 31, 2024

Supplier Name	Address	Location
Salvation Army - Brentwood Bay	7177 West Saanich Road	Brentwood Bay, BC

## **Agreed-Upon Procedures Report**

#### To the Executive Management of Electronic Products Recycling Association

#### Purpose of this Agreed-Upon Procedures Report

Our report is solely for the purpose of assisting Electronic Products Recycling Association (the "Organization") in meeting its regulatory reporting requirements and may not be suitable for another purpose.

#### Management's Responsibilities

Management has acknowledged that the agreed-upon procedures are appropriate for the purpose of the engagement. Management is responsible for the subject matter on which the agreed-upon procedures are performed.

#### Practitioner's Responsibilities

We have conducted the agreed-upon procedures engagement in accordance with the Canadian Standard on Related Services (CSRS) 4400, *Agreed-Upon Procedures Engagements*. An agreed-upon procedures engagement involves our performing the procedures that have been agreed with the Organization, and reporting the findings, which are the factual results of the agreed-upon procedures performed. We make no representation regarding the appropriateness of the agreed-upon procedures.

This agreed-upon procedures engagement is not an assurance engagement. Accordingly, we do not express an opinion or an assurance conclusion on the Statement of Operations and Net Assets for the province or on any other aspects of the subject matter.

Had we performed additional procedures, other matters might have come to our attention that would have been reported.

#### **Professional Ethics**

We have complied with the relevant ethical and independence requirements set out in rules of professional conduct / code of ethics in Canada.

#### **Procedures and Findings**

We have performed the procedures described in Appendix A, with respect to the Statement of Operations and Net Assets for the province for the year ended December 31, 2024, which were agreed upon with the Organization.

BDO Canada LLP

Chartered Professional Accountants, Licensed Public Accountants

Toronto, Ontario April 24, 2025

## **ELECTRONIC PRODUCTS RECYCLING ASSOCIATION**

Statement of Operations and Net Assets - British Columbia

	2024	2023
		(Note 1)
Revenue:		
Program fees	\$ 20,249,074	\$ 19,218,780
Other revenue	32,003	3,900
Investment and interest income	2,343,540	2,773,074

Other:		
Consumer awareness and communications	1,344,809	1,344,574
Administration	4,312,467	3,338,866
	5,657,276	4,683,440
	27,595,656	26,408,583
Deficiency of revenue over expenses	(\$4,971,039)	(\$4,412,829

Year ended December 31, 2024, with comparative information for 2023

			2024	2023
		Internally		
	Operating	restricted		
	reserve	reserve	Total	Total
Balance, beginning of year (Note 1)	\$ 26,835,612	\$ 14,093,100	\$ 40,928,712	\$ 45,341,541
Deficiency of revenue over expenses	(4,971,039)	-	(4,971,039)	(4,412,829)
Transfer to operating reserve	14,093,100	(14,093,100)	-	-
Balance, end of year	\$ 35,957,673	\$ -	\$ 35,957,673	\$ 40,928,712

**Note 1** - On October 1, 2024, Electronics Products Recycling Association and Canadian Electrical Stewardship Association amalgamated. The results for the year ended December 31, 2024 are the results of the amalgamated organizations for the year January 1, 2024 to December 31, 2024. The prior year comparative figures show the aggregated results for the two entities prior to amalgamation when they were operating and reported on independently.

## Appendix A

## Agreed-Upon Procedures and Findings

Pro	ocedures	Findings
1.	Obtain a copy of the Statement of Operations and Net Assets for the province as prepared by management (see attached).	No exceptions were noted.
2.	Obtain a copy of Electronic Products Recycling Association's ("EPRA") consolidation workbook from management, that includes a breakdown of the allocation of revenue and expenses and net assets by province. Recalculate the mathematical accuracy of the workbook.	No exceptions were noted.
3.	Agree the figures in the Statement of Operations and Net Assets for the province obtained in Procedure 1 above to the EPRA consolidation workbook obtained in Procedure 2 above.	No exceptions were noted.
4.	Agree the totals in the EPRA consolidation workbook obtained in Procedure 2 above for the Statement of Operations and Net Assets balances to the audited EPRA consolidated financial statements for the year ended December 31, 2024.	No exceptions were noted.
